## Board of Education.

Your School Board are pleased to report that the schools for the past year have been quite successful.

The examination showed by their thoroughness made in the studies that there was an earnest effort upon the part of the teachers and an interest manifested on the part of the scholars that was highly creditable to both. In order for a school to obtain the best results there must be good discipline, and those teachers that maintain the best discipline are deserving of praise, and scholars which attend school with the intention of obeying the rules and improving what advantages of education that are presented to them are, laying the foundation of a character, of which they may well feel proud.

We would urge upon the town the necessity of raising more money for the support of schools in order that all the children within its limits may at least have a liberal common school education.

We would urge upon the part of the scholars the necessity of improving every advantage of education afforded, both as a duty to their teacher and parents and that in after years they may

look back with pleasure to their school days rather than with regret of misused time.

As there was not a uniform method of ranking the deportment of the scholars used by the teachers, we could not print the rank without doing a great injustice to many of the best scholars in the town and consequently refrain from printing the same.

An agreement was made with the School Board of Moultonborough by which our children of the village school attended the Spring term in the old house. The school was taught by Miss Huntress of Moultonborough and continued 11 weeks. The second term was held in the new house. It commenced Oct. 17 and continued 10 weeks, in care of Miss Julia Etta True. We find Jennie C. Blackey, Lilla May Cook, James Nelson Cook, Freddie S. Coe, Leon Hawkins and Walter S. Sturtevant upon the roll of perfect attendance. Number of scholars attending the school, 25; reading, 25; spelling, 25; penmanship, 25; arithmetic, 21; geography, 7; composition, 9; drawing, 3;
